

## PRESSE RELEASE

Nufringen, March 19, 2025

### **Ensinger publishes sustainability report**

#### **Progress towards socially and environmentally responsible business practices**

Plastics processor Ensinger has published its latest sustainability report. “In the reporting year 2023/24, our company made good progress towards a socially and environmentally responsible way of doing business. It is particularly pleasing that we have achieved the CO2 reduction targets we set ourselves and are therefore still on schedule with regard to our 'net zero' target,” says Klaus Ensinger, Head of Sustainability at the Ensinger Group.

The current status report documents the family-owned company's commitment to sustainability and covers four areas: strategy and processes, environment, social affairs and corporate governance. In addition to the successful implementation of the climate strategy, Ensinger has made further progress. For example, the family-owned company already meets key requirements of the Supply Chain Act. In addition, the compliance management system has been further developed and risk management has been restructured.

Ensinger is also on schedule with the implementation of the EU Corporate Sustainability Reporting Directive (CSRD). “At the same time, we have to recognise that general conditions such as the shortage of skilled workers and the tense global economic situation are delaying individual projects,” says Klaus Ensinger.

Despite the challenging market environment, the plastics processor continues to pursue its goal of making sustainability measurable and transparent.

The **Ensinger Group** is engaged in the development, manufacture and sale of compounds, semi-finished materials, composites, technical parts and profiles made of engineering and high-performance plastics. To process the thermoplastic polymers, Ensinger uses a wide range of production techniques, such as extrusion, machining, injection moulding, casting, sintering and pressing. With more than 2,500 employees at over 30 locations, the family-owned enterprise is represented worldwide in all major industrial regions with manufacturing facilities or sales offices.
